09/475,531	12/30/1999	W. DAVID CONLEY	19260-1780	6461
36092	7590	10/15/2004		EXAMINER
STEVEN SULLIVAN 268 TERRIE DR POTOMAC FALLS, VA 20165				NGUYEN, DUC MINH
			ART UNIT	PAPER NUMBER
				2643

DATE MAILED: 10/15/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)
	09/475,531	CONLEY, W. DAVID
	Examiner Duc Nguyen	Art Unit 2643

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on _____.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1,3-7,23 and 24 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1, 3-7, 23-24 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) <input type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413)
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Date. _____.
3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date _____.	5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)
	6) <input type="checkbox"/> Other: _____.

DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, and 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nolting et al (6,351,453) in view of Lesley (6,188,752) and Casner (4,517,411).

Consider claims 1, 7. Nolting teaches a method for charging a activation fee for a telephone call direct to a called telephone number comprising receiving the called telephone number and billing information from a set activation fee payphone (col. 30, ln. 10-39); inherently identifying the telephone call as having the originating telephone number associated with the set activation fee telephone (col. 30, ln. 10-39); and charging the set activation fee for the telephone call (col. 30, ln. 10-39).

Nolting does not clearly teach determining if the billing information is valid; if the billing information is valid, then placing a telephone call to the telephone number received from the set activation fee payphone.

Lesley teaches determining if the billing information is valid; if the billing information is valid, then placing a telephone call to the telephone number received from the set activation fee payphone (col. 2, ln. 6-29; col. 6, ln. 31-42; col. 8, ln. 1-46).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the teachings of Lesley into the teachings of Nolting, so that the telephone owner can earn some profits and recoup losses from providing telephone service to telephone user. Nolting in view of Lesley does not clearly teach if the billing information is valid, then releasing the false dial tone; seizing a true dial tone.

Casner teaches a method for charging a fee for a telephone call direct to a called telephone number, comprising generating a false dial tone (dial tone generated by the PBX or PABX; col. 3, ln. 38-49); receiving the called telephone number and billing information (credit card, called telephone number, station number and/or room number; col. 3, ln. 38 to col. 4, ln. 17); maintaining the false dial tone (col. 3, ln. 38 to col. 4, ln. 26); if the billing information is valid (col. 4, ln. 18-26), then releasing the false dial tone; seizing a true dial tone (dial tone provided by the DDD network; col. 4, ln. 18-22); and placing the telephone call to the called telephone number (col. 3, ln. 38 to col. 4, ln. 26).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the teachings of Casner into the teachings of Nolting in view of Lesley in order to effectively verify the identity of the originating station and billing information.

Consider claims 3, 5. Nolting further teaches determining whether the originating number corresponds to an entry in a billing database (col. 30, ln. 10-39).

Consider claims 4, 6. Lesley further teaches the use of an SCP database (fig. 1, col. 9, ln. 45-63).

4. Claims 23-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nolting et al (6,351,453) in view of Casner (4,517,411).

Consider claim 23. Nolting teaches a method for calculating charge for a telephone call, comprising monitoring a telephone call placed to a called telephone number to determine call parameters (col. 30, ln. 10-39); determining whether the telephone call originated from a telephone having an originating telephone number that corresponds to an entry in a database (col. 30, ln. 10-39); determining a set activation fee applies to the telephone call; calculating the charge for the telephone call by using the call parameters to calculate a first portion of the charge (col. 30, ln. 10-39); and adding the set activation fee as a second portion of the charge by a network element, so that the set activation fee is independent of the first portion of the charge (since the LEC receives 20 cents or 25 cents for every call from a coin phone to a prepaid calling card number and the cost of the call is charged to the prepaid account. Therefore, the CDR inherently contains a portion for the duration of the call and another portion to indicate that the LEC would receive 20-25 cents). Nolting does not clearly teach if the billing information is valid, then releasing the false dial tone; seizing a true dial tone.

Casner teaches a method for charging a fee for a telephone call direct to a called telephone number, comprising generating a false dial tone (dial tone generated by the PBX or PABX; col. 3, ln. 38-49); receiving the called telephone number and billing information (credit card, called telephone number, station number and/or room number; col. 3, ln. 38 to col. 4, ln.

17); maintaining the false dial tone (col. 3, ln. 38 to col. 4, ln. 26); if the billing information is valid (col. 4, ln. 18-26), then releasing the false dial tone; seizing a true dial tone (dial tone provided by the DDD network; col. 4, ln. 18-22); and placing the telephone call to the called telephone number (col. 3, ln. 38 to col. 4, ln. 26).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the teachings of Casner into the teachings of Nolting in order to effectively verify the identity of the originating station and billing information.

Consider claim 24. Nolting further teaches the limitations of claim 24 in (col. 7, ln. 10-21. It is noted that Call Detail Record is an accounting record produced by Switches to track Call Type, Time, Duration, Facilities used, Originator, Destination, etc. CDRs are used for customer billing, rate determination, network monitoring, and facility capacity planning).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Nguyen whose telephone number is 703-308-7527. The examiner can normally be reached on 6:00AM-2:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz can be reached on 703-305-4708. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
